Engineering Services Program

The following product has been evaluated for compliance with the wind loads specified in the International Residential Code (IRC) and the International Building Code (IBC).

This product evaluation is not an endorsement of this product or a recommendation that this product be used. The Texas Department of Insurance has not authorized the use of any information contained in the product evaluation for advertising, or other commercial or promotional purpose.

This product evaluation is intended for use by those individuals who are following the design wind load criteria in Chapter 3 of the IRC and Section 1609 of the IBC. The design loads determined for the building or structure shall not exceed the design load rating specified for the products shown in the limitations section of this product evaluation. This product evaluation does not relieve a Texas licensed engineer of his responsibilities as outlined in the Texas Insurance Code, the Texas Administrative Code, and the Texas Engineering Practice Act.

Hardware - Hinges:**Systems 1 through 4:**

- Hinges; six required (three per door panel); Secured to the door panel with four, No. 10 x 1" screws. Secured to the door jamb with three, No. 10 x 5/8" screws and one, No. 10 x 2-1/2" screws.

Systems 5 through 8:

- Hinges; eight required (four per door panel); Secured to the door panel with four, No. 10 x 1" screws. Secured to the door jamb with three, No. 10 x 5/8" screws and one, No. 10 x 2-1/2" screws.

Hardware – Deadbolts and Locksets:**Systems 1 through 8:**

- Kwikset Series 400 Lockset; Located on the active door panel.
- Kwikset Series 980 Deadbolt; Located on the active door panel.

Hardware – Astragal:**Systems 1 through 8:**

- Astragal Retainer Bolt; Located in the astragal at the top and bottom.

Hardware – Strike Plates:**Systems 1 through 8:**

- Strike plate – Lockset; One required; Located on the door jamb; Secured with two, No. 8 x 2-1/2" PFH screws.
- Strike plate – Deadbolt; One required; Located on the door jamb; Secured with two, No. 8 x 2-1/2" PFH screws.
- Strike plate – astragal retainer bolt; Located on the head jamb; Secured with two, No. 8 x 2" PFH screws.

Thresholds:

- 1.375" aluminum adjustable cap sill, inswing (System 1, 5)

Impact Resistance:

System	Impact Resistant	Requirement
1-8	Yes	These products satisfy TDI's criteria for protection from windborne debris in the Inland I and Seaward zone. Install the assemblies at a height on the structure that does not exceed the design pressure rating for the assemblies.

Acceptance of Smaller Assemblies: Door assemblies with dimensions equal to or smaller than those specified are acceptable within the limitations specified in this report.

Acceptable Configurations: The following configurations are acceptable: X, XX, OX, XO, OXO, OXXO

Sidelites: Sidelites must only be used with doors. Sidelites must not be installed individually.

Installation:

General: The door assembly must be fastened to minimum Spruce-Pine-Fir dimension lumber wall framing. The door assembly must be secured to the wall framing using minimum No. 10 screws as follows:

Head (Door and Sidelite): Minimum No. 10 x 2-1/2" screws; Located approximately 6" from each end; 3" and 6" on each side of the mullion and the astragal, and one screw placed at the centerline of each door panel.

Sill (Door and Sidelite): Minimum No. 10 x 2" PFH screws (Inswing); Minimum No. 10 x 2-1/2" PFH screws (Outswing); Located approximately 6" from each end; 3" and 6" on each side of the mullion and the astragal, and one screw placed at the centerline of each door panel.

Jambs: Minimum No. 10 x 2-1/2" PFH screws; Located approximately 6" from each corner and spaced approximately 14" on center.

NOTE: All fasteners must be long enough to penetrate a minimum of 1-1/2" into the wood framing. If the frame sill is secured to concrete rather than wood framing members, then a 3/16" diameter concrete anchor may be substituted for the No. 10 x 2" long screws noted above. The concrete anchor shall have a minimum embedment of 1-1/4" into the concrete.

Note: Keep the manufacturer's installation instructions available on the job site during installation. Use corrosion resistant fasteners as specified in the IRC, the IBC, and the Texas Revisions.
